

5.5" Chain Cutting DWCM

The chain cutting DWCM was designed to cut chain links up to 5.5" OD. The clamping mechanism was engineered to allow the DWCM to clamp using the links above & below the link to be cut.

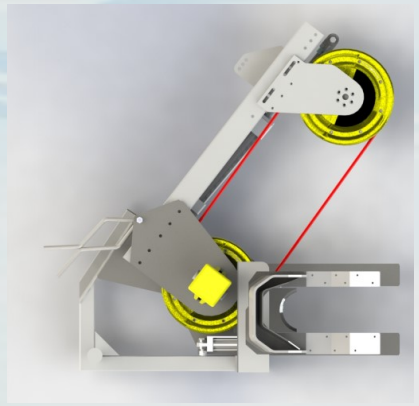

The DWCM can be powered directly from ROV or via surface umbilical.

The result is over 180 successful chain cuts. CUT can advise a best practice for chain cutting in air or subsea.

Contact CUT UK for further information.

5.5" DWCM

5.5" DWCM		
Performance	Up to 5.5" OD tubular cutting capacity	
Power Requirement	Hydraulic Power 45 l/min @ 200 bar	
Weight (kg)	Air	Water
	103	87
Dimensions (mm)	Tilting arm closed	Tilting arm open
Length	1380	1040
Width	790	1150
Height	430	430
