

The 64" DWCM is an extremely versatile cutting tool. It comes in 2 formats, the 64" standard and the 64" extended. The 64" Extended has a longer cutting stroke to allow cutting of longer targets such as piles c/w launch runners. Specially designed saddles are fitted to the DWCM to facilitate clamping of such structures.

The 64" DWCM can be powered via surface umbilical or interfaced directly to a WROV and positioned using WROV or divers.

Additional buoyancy can be added and 'trimmed' to suit client requirements with a depth rating of up to 3000m. It is equipped with a crash frame to avoid damage to the main structure of the DWCM during deployment and operation. The crash frame is fitted with ROV handles to facilitate ease of handling by WROV.

The 64" DWCM can be used to cut any target up to 64" OD including pipelines, vertical or inclines pipes, reinforced concrete, composite cables, concrete legs, flexible risers, launch runners and other structures.

64" DWCM

Performance	Up to 64" OD tubular cutting capacity	
Power Requirement	Hydraulic Power 110 l/min @ 200 bar	
Weight (kg)	Air	Water
	1380(+/-50)	30(+/-5)
Dimensions (mm) – any clamp position		
Length	4490	
Width	2800	
Height	985
